

Farming and Manufacturing Practices

We grow many of our raw materials on company-owned, certified organic farmland.

- Nutrient-rich soil located in Wisconsin's Kettle Moraine basin
- Verification of the appropriate mineral and nutrient levels in the soil before planting begins
- Use untreated and GMO-free seed
- Consistently monitor the health of our crops
- Crop rotation every year to prevent disease and ensure soil vitality
- Practice eco-sensitive manufacturing by returning plant and other raw material by-products to the land after processing

We process to preserve enzymatic vitality and nutritional potential of ingredients.

- Low-temperature, high-vacuum drying techniques
- A special separating process to extract a concentrated raw material laden with both fat- and water-soluble nutrients
- Immediate processing of plants upon harvest
- No artificial flavoring
- Only natural binding ingredients

We maintain product quality and integrity through exemplary quality control standards.

- Degreed microbiologists and chemists on-site
- Weekly bacterial tests on as many as 400 samples of raw materials, work in process, and finished products
- Vitamin and mineral analysis to ensure label claims are accurate and that maximum nutrition is delivered
- Physical tests on tablets, capsules, and powders to ensure product consistency

The History & Principles of Standard Process

Founded in 1929 by Dr. Royal Lee, Standard Process has been a leader in the field of natural whole food supplements for more than 75 years. Dr. Royal Lee believed that, "The quality of a whole food supplement is dependent on the quality of the manufacturing process." This remains the foundation of the Standard Process doctrine today.

Owned and operated by relatives of Dr. Lee, Standard Process manufactures its supplements from start to finish at its facility located in the heartland of America: Palmyra, Wisconsin. Beginning at the company's 1,000 acres of farmland and continuing through the final stages of our unique processing, Standard Process provides the highest quality food supplements available.

Maintain Your Inner Harmony

Why St. John's Wort-IMT™ is Best

We combined St. John's wort extract, whole St. John's wort powder, and inositol with a proprietary, whole food based mineral and nutrient complex to further enhance the desired calmativ effect of St. John's wort. The formula also contains calcium and magnesium to help promote the healthy transmission of nerve impulses. St. John's Wort-IMT offers patients a safe and effective means of mood and emotional support.*

How St. John's Wort-IMT™ Keeps You Healthy

Enhances Immune Response

St. John's wort can help support the body's natural resistance mechanisms.*

Helps You Maintain Calm

St. John's Wort-IMT contains inositol to increase the nervous system's response to emotional stimuli. It helps maintain calmness and helps the nervous system operate at peak efficiency as it copes with the ups and downs of everyday life. Inositol is a precursor of important chemicals needed for proper neuro-transmission.*

Maintains Emotional Balance

Health care professionals in many parts of the world use St. John's wort to stabilize mood. Inositol works to bring about greater emotional tranquility. Kelp, a source of B-complex vitamins and minerals, supports healthy brain tissue and helps maintain the membranes surrounding the brain, spinal cord, and sensory nerves.*

The Standard Process Mood Support Line

Along with St. John's Wort-IMT, Standard Process offers these other products to assist in mood enhancement.

Orchex® contains male bovine reproductive gland Cytosol™ extract. Products made with Cytosol™ extracts contain natural nutrients and specific substances that are produced in a particular gland, such as nucleic acids, enzymes, hormone precursors, etc. The combination of mineral complexes, orchic Cytosol™ extract, and other important nutrients in Orchex works together as a potent calmativ to promote and help maintain balanced function of the central nervous system.*

Min-Chex® contains unique ingredients to help keep the nervous system healthy. Iodine helps regulate normal physical and mental growth and development. B-complex vitamins in Min-Chex aid in energy production and help maintain emotional balance.*

Min-Tran®, our vegetarian natural calmativ product, contains mineral complexes from pure-vegetable sources, including kelp and alfalfa. Min-Tran also contains calcium and magnesium that help promote emotional balance and maintain inner harmony.*

The Whole Food Difference

All Standard Process products are based on one simple belief—good health comes from good nutrition, and the best nutrients come from whole foods. Each supplement formula is built on this holistic paradigm. Our product formulas contain unique combinations of whole foods (whole plants, animal tissue extracts and concentrates, and botanicals), which contain essential vitamins, phytonutrients, and minerals to provide optimal health.
